

Monoslide™ Classic

Sports turf

WHEN THE BOTTOM LINE IS THE TOP PRIORITY.

Budgets are tight everywhere these days. And, all too often, reduced spending also means reduced performance. But, fortunately, that doesn't have to be the case with your turf. Thanks to TenCate Monoslide™ Classic turf blades.

Cut costs, not corners.

While affordable, Monoslide™ Classic is made, like all TenCate turfs, to play well for a long time.

The blades are a monofilament design that is solid all the way through. So they resist wear and tear more effectively. The triangular shape further aids durability and reduces glare. But that's just the start. Compared to other turfs of the same cost, Monoslide™ Classic not only wears better but plays better, offers a softer hand, and more UV resistance to prevent fading.

Proven in the field. Or, more accurately, on the field.

Of course, the ultimate test of a turf isn't the claims made by marketers.

It's how it performs every day in real life. And that is where Monoslide™ Classic has impressed most of all. Its attributes, from playability to durability, have been well established over many years on hundreds of athletic fields all around the world.

So don't let budget concerns cost you field performance. MonoSlide™ Classic is a proven, budget-friendly solution.

Of course, if you are in the market for an even higher standard of performance, isn't it good to know TenCate makes that too?

TenCate: technological innovation, sensible solutions.

TenCate has decades of industry-leading turf fiber innovation and offers any kind of turf you could ever possibly need. From our Monoslide™ fibers that provide great playability and durability for the budget minded. To our XQ™ technology that produces incredibly resilient monofilament fibers. To XP Blade™, a true breakthrough in durability of multi-use and high-use fields. If it's turf you need, TenCate has got it. And we always exceed expectations.

Monoslide™ Classic

Material type : Polyethylene (PE)
Shape : 
Blade type : Monofilament
Denier / ply : 10,800 / 6
Filament thickness : Max 265 µm
Filament width : 1.4 mm
UV protection : Fiber embedded

PHYSICAL PROPERTIES	TEST METHOD	TENCATE MONOSLIDE™ PRO IN RECOMMENDED CONSTRUCTION		FIFA 2-STAR REQUIREMENTS MIN. / MAX.
		BEFORE	AFTER	
Ball roll	FIFA test method 03	6,6	7,9	4.0 m / 8.0 m (after 12 months: 4 m / 10 m)
Rotational resistance	FIFA test method 06	36 Nm	38 Nm	30 Nm / 45 Nm

TenCate turf products are made without adding any heavy metals and conform to the ASTM F 2765-09 and LAGA standards for heavy metal content and DIN 18035-7 for leaching of heavy metals.
