

TENCATE Monoslide™ Pro

Sports turf

THE TURF THAT EXCEEDS EXPECTATIONS, NOT BUDGETS.

PERFORMANCE

If money were no object, finding a high-performance soccer turf would be no problem. But, these days, money is always an object. Clients demand more for less. With TenCate Monoslide™ Pro, you can give them not just more, but more than they expect!

Times like these demand turf like this.

For years, when it came to sports turf, affordability was mutually exclusive with attributes like playability, resilience, and durability. But innovative technology has a way of changing things. In this case, it changes everything.

For starters, Monoslide Pro is remarkably playable. With great feel to players, consistent ball roll, and reduced glare through dispersed light reflection. It's resilient. The monofilament blades are designed to return to an upright position longer than other monofilaments when trampled. So the field retains its great look and playability. And it's durable. The turf resists matting in excessive play, making it perfect

for fields that see a lot of action. Which makes it even more of a value.

In the TenCate tradition of turf technology.

Monoslide Pro promises plenty. What keeps those from being empty promises is the company behind it. TenCate has an unparalleled tradition in the industry. Our decades of leadership in polymer technology innovation have spawned an exciting new generation of turfs that exceed anything previously possible. Regardless of budget.

TenCate Monoslide XQ. For ultimate performance.

For performance demands even greater than Monoslide Pro, ask about Monoslide XQ. The pinnacle of our monofilament technology. Made by a proprietary manufacturing process that produces the most resilient, most playable, soccer turf ever. In fact, we offer an optional 5-year warranty system that ensures Monoslide XQ turf will meet FIFA 2-Star certification standards. No one else comes close.

TENCATE™
materials that make a difference

TENCATE Monoslide™ Pro

Material type : Polyethylene (PE)
 Shape : 
 Blade type : Monofilament
 Denier / ply : 10,800 / 6
 Filament thickness : 310 (core) / 130 (base) µm
 Filament width : 1.45 mm
 UV protection : Fiber embedded

RECOMMENDED TURF CONSTRUCTION

Yarn : 10,800 / 6
 Backing : TenCate Multi-layer D12
 Turf gauge : 3/8 inch
 Stitch rate : 7.75/3 inches
 Pile height : 1.77 inches
 Face weight : 45 oz/yd²
 Infill : 12 mm sand, 15 mm TenCate I-Smart® Pro

DURABILITY RESULTS BEFORE AND AFTER LISPORT WEAR SIMULATION OF 12,200 CYCLES.

PHYSICAL PROPERTIES	TEST METHOD	TENCATE MONOSLIDE™ PRO IN RECOMMENDED CONSTRUCTION		FIFA 2-STAR REQUIREMENTS MIN. / MAX.
		BEFORE	AFTER	
Ball roll	FIFA test method 03	6,6	7,9	4.0 m / 8.0 m (after 12 months: 4 m / 10 m)
Rotational resistance	FIFA test method 06	36 Nm	38 Nm	30 Nm / 45 Nm

EFFECTS OF ARTIFICIAL WEATHERING

PHYSICAL PROPERTIES	TEST METHOD	TENCATE MONOSLIDE™ PRO	FIFA 2-STAR REQUIREMENTS
Pile color	FIFA test method 10	4-5	≥ grey scale 3
Pile tensile strength	FIFA test method 10	-21%	% change ≤ 50%

TenCate turf products are made without adding any heavy metals and conform to the ASTM F 2765-09 and LAGA standard for heavy metal content and DIN 18035-7 for leaching of heavy metals.
