

GRASS

TENCATE

Monoslide™ Ultra with XQ™ technology

Sports turf

LOOKS LIKE REAL GRASS. LASTS A LOT LONGER.

PERFORMANCE

Natural grass is beautiful. So, naturally, the look of grass is desirable. There are just two problems. And they are big ones: 1) Grass doesn't stand up very well to repeated use as a playing field. And, 2) Grass is very costly to maintain.

Enter TenCate Monoslide™ Ultra with XQ™ technology.

Looks like real grass on Day One. And Day 2000.

Monoslide™ Ultra with XQ™ technology is curved and ribbed like real grass so it looks and performs like real grass.

But there the similarity ends. Thanks to our XQ™ technology, it is incredibly durable and retains its great look day in and day out, for years on end. All the while it offers an even, predictable field underfoot for great playability. And it does it all without the cost of watering, fertilizing, and mowing.

It adds up to the perfect turf for everything from landscaping to world championship sporting events. And that's the real beauty.

XQ™ Technology. For durable monofilaments.

XQ™ technology is a breakthrough in polymer processing developed by TenCate. It gets rid of weak points to produce unprecedented split resistance. And, because XQ™ technology makes monofilament so split-resistant, there's no need to resort to thicker blades. So you get an even lusher, more natural-looking field.

But remember, XQ™ technology is proprietary. Only TenCate has it. So only TenCate can produce turf blades this durable.

TenCate: technological innovation, sensible solutions.

TenCate has decades of industry-leading turf fiber innovation and offers any kind of turf you could ever possibly need. From our Monoslide™ fibers that provide great playability and durability for the budget minded. To our XQ™ technology that produces incredibly resilient monofilament fibers. To XP Blade™, a true breakthrough in durability of multi-use and high-use fields. If it's turf you need, TenCate has got it. And we always exceed expectations.

materials that make a difference

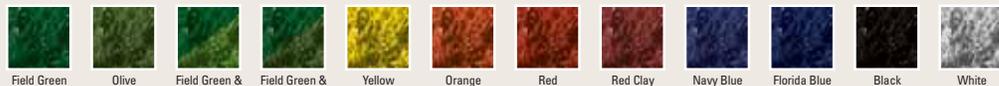

Monoslide™ Ultra with XQ™ technology

- Material type** : Polyethylene (PE)
- Shape** :
- Blade type** : Monofilament
- Denier / ply** : 10,800 / 6
- Filament thickness** : Max 310 µm
- Filament width** : 1.20 mm
- UV Protection** : Fiber Embedded

TenCate turf products are made without adding any heavy metals and conform to the ASTM F 2765-09 and LAGA standards for heavy metal content and DIN 18035-7 for leaching of heavy metals.
