

TENCATE Tapeslide™ XP

Sports turf

STAYS AROUND WHEN OTHER TURFS SPLIT.

PERFORMANCE

Splitting is the great enemy of sports turf yarns. It's the main thing that causes them to wear out. All yarns with the very notable exception of TenCate Tapeslide™ XP.

The one to play on. And on. And on. And on...

Tapeslide™ XP is made utilizing a proprietary manufacturing process – developed exclusively by TenCate – that prevents splitting. So it lasts longer than any other tape or monofilament yarns.

The tape twists when played on rather than lying flat so it retains its evenness and natural ball roll. You get better tuft bind – the yarn is so well rooted into the system that blades are not lost. And Tapeslide XP holds infill in place better than monofilament yarns, reducing infill splash, bumps, and potholes. It all adds up to turf that plays better longer. In fact, since TenCate XP's introduction six years ago, every installation is still in use and in excellent condition.

You'd expect a warranty. But you'd never expect this one.

That's because no one else has come anywhere close to our new, Tapeslide XP 5-Year Durability Warranty available through an additional purchase. The industry's first to guarantee for five years of unlimited play against excessive fiber splitting which leads to matting, dusting and fiber loss and an early end to a field's life. What's more, it's based on the original value of the field. So we not only claim greater durability, performance and safety, we back it up.

Part of TenCate's new family of cutting edge products.

The pinnacle of decades of turf fiber innovation. They include Tapeslide XP, for maximum durability of multi-use and high-use fields. TenCate Monoslide™ XQ, the new standard in monofilament yarn, for maximum resilience and performance. And TenCate XK, our new, advanced turf backing. All Xceed Xpectations.

materials that make a difference

TENCATE Tapeslide™ XP

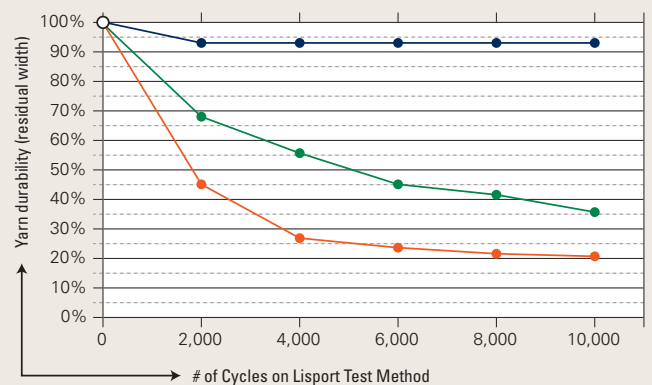

Material type : Polyethylene (PE)
Blade type : Non post-fibrillation tape
Denier / ply : 5,000/1; 8,000/1; 10,000/1
Fibrillation : Parallel long slit
Filament thickness : 100 µm thick, non-abrasive
UV Protection : Fiber embedded

BENCHMARK LISPORT WEAR SIMULATION

# of cycles	TenCate Tapeslide™ XP	BonaFFusion	Nexcel NexGen
0	100%	100%	100%
2,000	92.3%	68.7%	45.3%
4,000	92.3%	55.6%	28.8%
6,000	92.3%	45.6%	24.5%
8,000	92.3%	41.0%	21.0%
10,000	92.3%	36.8%	20.2%

Durability of tape yarn

TenCate turf products are made without adding any heavy metals and conform to the ASTM F 2765-09 and LAGA standard for heavy metal content and DIN 18035-7 for leaching of heavy metals.
