TENCATE™ APPOINTS NEW MASTER DISTRIBUTOR

PENDERGRASS, GA. – TenCate™ is pleased to announce the appointment of Lancer Textiles as Master Distributor for the Industrial Fabrics division effective immediately.

Lancer Textiles' role as Master Distributor will be to service those TenCate™ customers that may not be able to meet the minimum order quantity requirement, who typically buy small quantities, who order infrequently and to fulfill special converting needs and requests, such as slitting, re-rolling, etc.

“Lancer Textiles is a welcome addition to our distribution network. As our Master Distributor partner Lancer Textiles will stock and sell first quality products of our most popular styles and put ups and will help bridge the gap for those customers that have special converting needs, who buy small quantities, or who are unable to buy direct due to minimum order requirements. Lancer will help us expand our customer base while continuing to provide world class customer service and product quality which our customers have come to expect” said Kevin Jung, Director of Sales and Marketing for the Industrial Fabrics division of TenCate™.

TenCate's Industrial Fabrics division develops products which are engineered with advanced application knowledge to meet the needs and specifications for various markets such as horticulture, agriculture, recreational, containment, filtration, transportation/construction, furniture/bedding, industrial nonwovens, specialty, dewatering, and aquaculture.

For further information please feel free to contact Lancer Textiles direct.
