

Application Story

PROJECT | WACK WACK GOLF COURSE, MANILA
 Product | Geotube® Marine Structures Technology
 Application | Diversion Dikes

Location | Wack Wack Golf Course,
 Manila, Philippines
 Installation | 1999

The Challenge:

The golf and country club needed to prevent any back flow of polluted storm water.

The Solution:

A diversion dike was constructed with Geotube® marine containment technology. The completed installation provided a line of separation from the lake at Hole 13 and the polluted stream at the property's edge [photo 3].

The Results:

The dike performed well, and it blended in with the championship golf course as vegetation covered the finished structure [photo 4].
