

## Application Story

PROJECT | PROGRESSO, MEXICO  
 Product | Geotube® Marine Structures Technology  
 Application | Breakwaters

Location | Progresso, Mexico  
 Installation | 2005/2006

**The Challenge:**

Many beaches of Progresso were destroyed by a series of hurricanes in 2005. The community needed to protect their remaining beaches and start to rebuild the shoreline.

**The Solution:**

Geotube® containers were installed along the shoreline as part of the restoration project [photo 2]. After the units were installed, the beachfront began to recover.

**The Results:**

Eventually the Geotube® units were almost completely covered by the renourished beach [photo 3]. The sands continue to grow for this coastal area [photo 4].
