

Flexible Intermediate Bulk Containers (FIBC)

High Performance Bulk Bags

High Performance Bulk Bags

The Right Bag for Your Product and Operation

TenCate Geosynthetics Asia is a leading manufacturer of technical textiles with extensive fabrication capabilities in Asia. We produce a comprehensive range of high performance Flexible Intermediate Bulk Containers (FIBCs), commonly known as bulk bags. The bulk bags are engineered from high quality UV stabilized woven polypropylene that is water resistant and inert to chemicals.

TenCate's bulk bags are available as Single Trip or Heavy Duty Multi-Trip. We also custom design the bulk bags to required specifications to comply with various Standards including Dangerous Goods requirements. Specific lifting methods can be incorporated, such as single point, four point or sleeve lift. Special anti-static bulk bags can also be made.

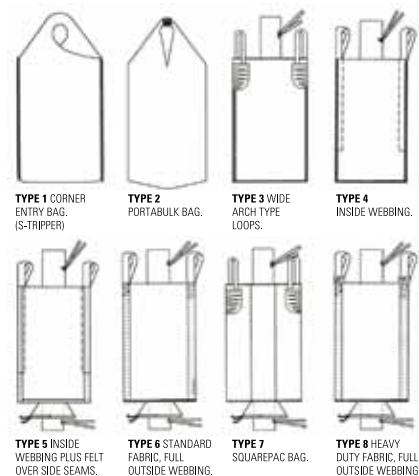

High Quality & Performance

TenCate's high performance bulk bags are designed for the toughest working conditions. The bags are durable, weather-proof and resistant to vermin. They stack safely and easily with or without pallets. TenCate's bulk bags are tested to local and international safety standards through its FIBC testing facility to ensure consistent quality and performance of the bulk bags.

Cost Effective & Efficient Delivery

Our diverse design options and complete production chain means you get the bag you need at the most cost effective price. TenCate's excellent sales and distribution network in Asia Pacific ensures timely deliveries to your location.

Types of Bulk Bags

THE BENEFITS

- Comprehensive range of standard bulk bags
- Can be custom made to specifications
- Anti-static bulk bags are available
- Made from high quality & performance fabrics
- UV resistant
- Water resistant
- Chemical resistant
- Cost effective

General Specification

Fabric :

High quality woven polypropylene (coated or uncoated), UV and chemical resistant

Standards:

Most Single Trip bulk bags comply with current international standard for FIBCs including Australian Standards. They are available with Dangerous Goods Approval on request.

Liners:

Optional liners provide added security against moisture ingress.

Safe working loads:

500kg to 2000kg. Minimum 5:1 safety factor for all bags to 1.5 tonnes, providing maximum protection against misuse.

Printing:

Bulk bags can be printed with individual designs.
