

CABIN BACK WALL

TenCate Advanced Armour provides a wide range of ballistic fabrics and lightweight armour systems for highly customised cabin back wall solutions. These can be developed as OEM equipment as well as retrofit applications.

SLIDING DOORS

Lightweight armour solutions for sliding doors can be provided through the use of composite lightweight armour systems and ballistic fabrics. Through the use of lightweight materials, function and visual appearance of the sliding doors will not be affected.

ANTI CUT SYSTEM

TenCate provides a made to measure anti-cut system suitable for all types of Cash-in-Transit vehicles. The system will provide protection from manual tools and give 30 minute anti-cut protection from all powered cutting tools. The system can be used to protect specific areas within the vehicle or areas around the vehicle walls.

FIREWALL

For fire walls and other complex and customised internal armour features, TenCate Advanced Armour provide lightweight 3D armour solutions with no impact on performance or crew comfort.

CABIN DOORS

TenCate Advanced Armour provides state-of-the-art customised armour solutions to the cabin doors of cash-in-transit vehicles. These ensure the highest level of survivability for the crew while maintaining the overall operability of the vehicle.
