

The TenCate Tecastyle® collection is a range of fabrics with a stylish appearance.

**KG 308 - 245 g/m<sup>2</sup>**  
**KG 316 - 325 g/m<sup>2</sup>**  
**KG 340 - 325 g/m<sup>2</sup> - Canvas**

**TenCate Tecastyle® - Denim-Look**  
**65/35% Polyester/Cotton**

There is a growing demand for workwear to be more stylish. At TenCate we already manufacture fabrics that are both functional and fashionable: we produce fabrics that stretch, making them more comfortable, as well as fabrics designed to have logos or trendy details printed on them. With the introduction of the TenCate Tecastyle® Denim-Look collection, our range has been expanded even further. The TenCate Tecastyle® Denim-Look is an innovative treatment that creates a professional, yet casual look for fashionable workwear and corporate clothing.

**Outstanding value** – Suitable for use in the construction, transport or distribution sectors and for all general workwear purposes. Suitable for application in workwear for mechanics, factory workers, etc.

**Extensive range** – TenCate Tecastyle® Denim-Look is available in KG 340, KG 316 and KG 308. Other polyester/cotton compositions with Denim-Look are available on request – with a minimum order of 3000 metres.

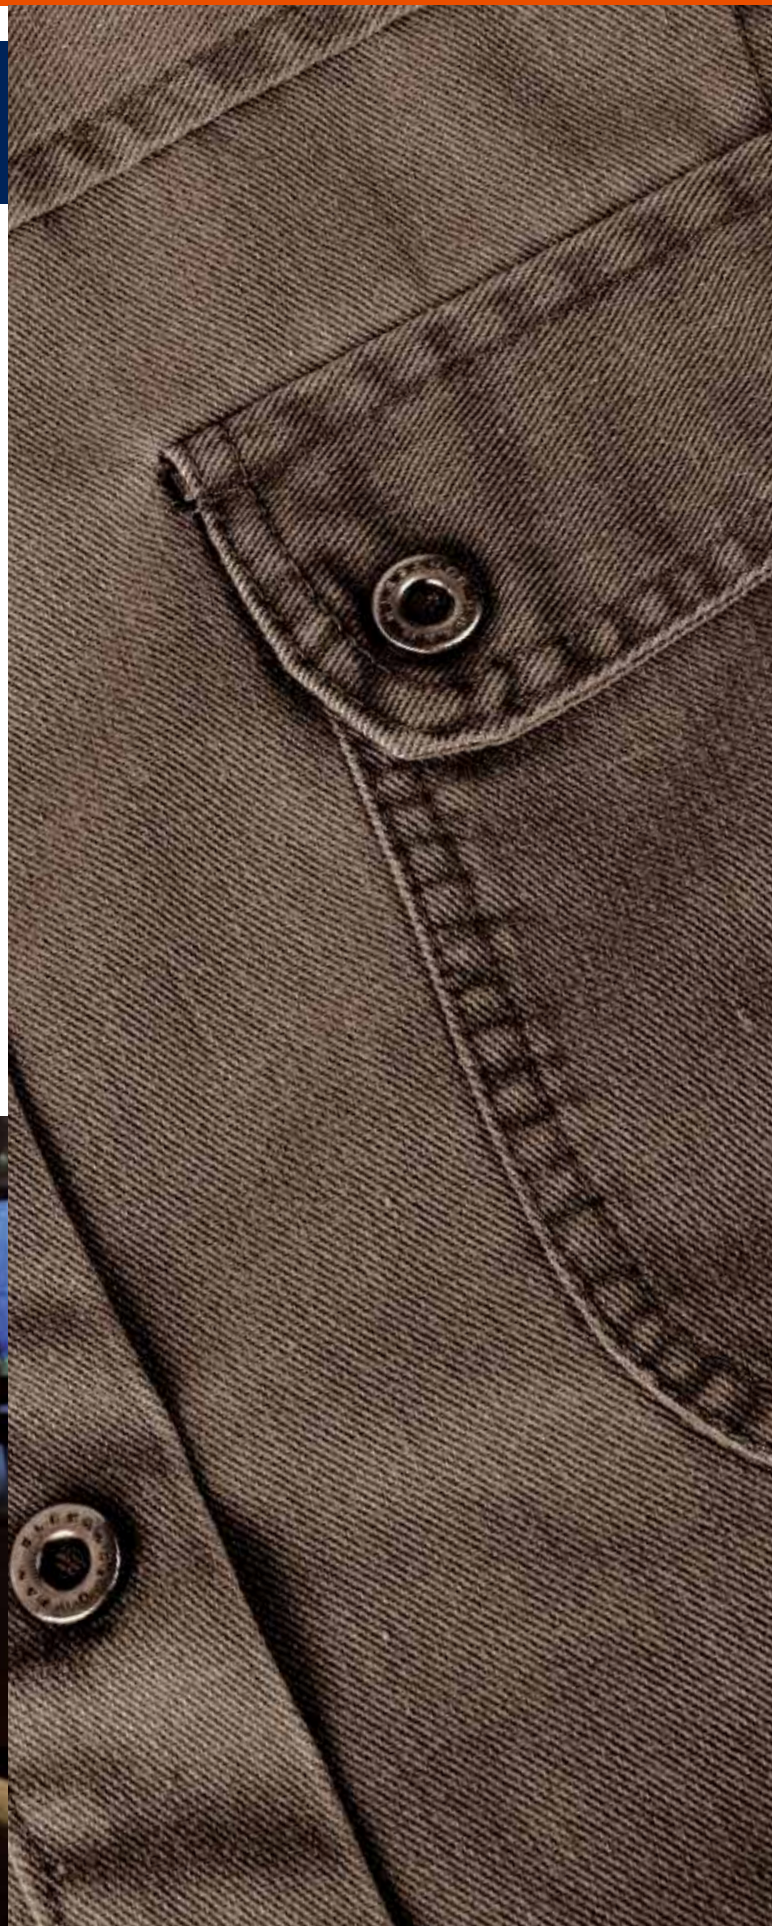

**Optional colours** – The TenCate Tecastyle® Denim-Look fabric is available, as standard, in Denim-Look Brown and Denim-Look Green – with a minimum order of 100 metres. On request, TenCate Tecastyle® Denim-Look can also be dyed a number of other colours.

**Stylish appearance** – The combination of TenCate Tecastyle® Denim-Look and the canvas weave of KG 340 creates particularly stylish and casual clothing.

**Industrial wash** – As it is resin-treated with an Easy-Care finish, the fabric is suitable for industrial laundering. It is not affected by tunnel finishing.

**Care instructions** – To activate the Denim-Look, garments should be washed before wear. Do not iron or press the garments before the first wash. Follow the washing instructions and always separate colours. Never wash in combination with other garments. The machine should be loaded with a maximum of two-thirds full in order to create the friction necessary to give the product the Denim-Look.

**TenCate Protective Fabrics**

TenCate is the world's No. 1 producer of protective fabrics for the manufacturing of safety wear. We supply garment-makers with an extensive range of top-quality and technologically advanced fabrics.

Our fabrics become lifesaving garments for firefighters, industrial workers, military personnel and other professionals working under hazardous conditions in danger zones around the world.

We work closely with our customers, end-users, fibre and chemical manufacturers and independent laboratories. As a result, TenCate Protective Fabrics is the one source the world looks to for leadership in knowledge of materials, consistent product quality, and a proven commitment to service excellence.
