

GRASS

# TENCATE Monoslide™ Ultra

Sports turf

## IF YOU LOOK CLOSELY YOU CAN TELL IT'S NOT REAL GRASS.

Very closely. Because TenCate engineers have finally created what turf manufacturers have promised for years: turf that looks like real grass. Not a green shag carpet only the 70's could love. But turf that actually looks like grass.

### A solution so simple, it's shocking that it's new.

Turf engineers around the world have toyed with all sorts of composites, shapes, thicknesses, twists, turns and even gimmicks in an attempt to replicate the look and feel of grass.

Then, our engineers hit upon an idea so elegant as to surprise. A turf blade shaped like a grass blade. And curved like a grass blade. And ribbed like a grass blade.

Guess what? It looks like a grass blade. And performs like a grass blade. With one very notable exception. It's far, far more durable than a grass blade. Which makes it perfect for everything from landscaping to professional sports. Even on high-use installations.

### So simple, it's also affordable.

Suddenly – because it is such a simple solution – an attractive, durable, playable surface doesn't have to bust the budget. And, when you factor in the money you save not watering, fertilizing and mowing grass, it becomes a downright bargain.

Still, you could take it further. Add our proprietary XQ™ technology to Ultra and it becomes even more resilient and durable.

### TenCate: technological innovation, sensible solutions.

TenCate has decades of industry-leading turf fiber innovation and offers any kind of turf you could ever possibly need. From our Monoslide™ fibers that provide great playability and durability for the budget minded. To our XQ™ technology that produces incredibly resilient monofilament fibers. To XP Blade™, a true breakthrough in durability of multi-use and high-use fields. If it's turf you need, TenCate has got it. And we always exceed expectations.

materials that make a difference

**TENCATE**  
**Monoslide™ Ultra**

- Material type** : Polyethylene (PE)
- Shape** : 
- Blade type** : Monofilament
- Denier / ply** : 10,800 / 6
- Filament thickness** : Max 310 µm
- Filament width** : 1.20 mm
- UV protection** : Fiber embedded

TenCate turf products are made without adding any heavy metals and conform to the ASTM F 2765-09 and LAGA standards for heavy metal content and DIN 18035-7 for leaching of heavy metals.
