# SOLUTIONS FOR PERSONAL PROTECTION

## PRE-PREGS FOR HELMETS

The lightweight pre-pregs from TenCate are cost-effective and customizable for helmet manufacturers, and the materials offer both user comfort and protection against a range of threats.

## HARD ARMOUR INSERTS

TenCate Multilight™ available in a wide range of shapes, curvatures and protection levels, either as stand-alone plates for use in plate-carriers or as plates to be used in conjunction with vests.

## FABRIC FOR UNIFORMS

The TenCate Defender M™ fabrics offer exceptional moisture management, breathability, and inherent heat and flame protection.

## PLATES FOR SIDE, BACK, GROIN, AND NECK

TenCate offers a range of plates for protection of back, neck, groin etc., designed to protect vulnerable areas against projectiles and fragments. The plates are durable and designed to ensure comfort and mobility for the user.

## BALLISTIC SHIELDS

Ballistic shields protect against rifle and AP ammunition and can be customized in a multitude of shapes and protection levels and can be fitted with a variety of equipment, such as adjustable handles, shock protection, periscope, day & night camera, or night vision.

## SOFT PACKS FOR VESTS

Protection against hand guns, fragments, needles, knives and edged blades. The soft packs can be customized for a wide range of vest designs for military, law enforcement officers and tactical teams.

## LEG PROTECTION

TenCate can design protection to fit the legs of tactical law enforcement teams, ensuring that the operator is protected against hand gun and rifle fire below the shield.
