Trumbull®

TRUPAVE® ENGINEERED PAVING MAT  
TRUE PERFORMANCE. TRUE PROTECTION.

**PROJECT NAME:**

City of Casper, Wyoming  
Project No. 03-39

**LOCATION:**

Casper, Wyoming

**OWNER:**

City of Casper

**AUTHORIZED DEALER:**

Geotec Industrial Supply

**INSTALLED BY:**

Hedquist

**PAVING CONTRACTOR:**

Hedquist Construction

**AREA INSTALLED:**

38,000 sq. yds.

**EXISTING PAVEMENT TYPE:**

Asphalt

**INSTALLATION DATE:**

September 2004

**TRUPAVE® ENGINEERED PAVING MAT PROJECT PROFILE**

This particular project was funded under the 2004 miscellaneous street repairs and drainage improvements project for Casper, WY. Paving fabric was originally specified for the Poplar Street section, but was upgraded to paving mat. The *TruPave* engineered paving mat upgrade was made to further prevent reflective cracking on this heavily trafficked arterial road. Transverse cracks were evident in the existing pavement (below). A two inch hot mix asphalt wearing course, utilizing a PG 64-22 binder was used for the project. This job represents the first significant *TruPave* engineered paving mat installation in Wyoming and was placed on the heels of another *TruPave* engineered paving mat installation in front of Wal-Mart in Evanston, WY. Poplar Street was last visited in late October and no signs of surface cracking or other distresses were observed.
