TenCate receives major order for three TenCate Defender™ M fabrics

TenCate Defense & Tactical, the leading supplier of inherently flame resistant (FR) fabrics for ground troop uniforms, was selected to receive a major order for new TenCate Defender™ M fabrics specifically designed to meet new end-user needs to improve pant performance. The new fabrics, including TenCate Defender™ M Stretch – a unique and durable stretch FR fabric – are the result of the commitment of TenCate to continually improving the protection, comfort, and durability of its advanced materials.

The US Army awarded two new contracts to purchase the Army Combat Pant which will be made of three TenCate Defender™ M fabrics that are new to the US Army. These pants, specifically designed for soldiers currently deployed outside the wire in the Afghan theatre, are intended to provide additional comfort and durability for the rigors of the mission in the rough terrain of the Afghan mountains, but also provide extra FR protection needed to reduce burn injuries encountered when involved in IED attacks.

The contracts have been awarded to Crye Precision, Massif Mountain Gear and Propper International. A Federal Procurement Listing (FPL) will provide Ready One and Goodwill Industries with funding to manufacture the ACP as well. TenCate Defense & Tactical is already in production to supply the fabric for Army Combat Pants which are expected to be in the Afghan theatre by early 2012.

Innovation

TenCate Defender™ M is the leader in FR protection for soldiers, and TenCate has proudly won repeated solicitations and 'sources sought' evaluations since 2007. Driven by the dedication to continually improve the performance of TenCate Defender™ M, conditions such as the nature of combat action and the rough Afghan terrain were studied in an effort to mitigate severe wear and tear of the combat uniform. Engineers at TenCate reexamined the performance testing data and found ways to make TenCate Defender™ M even more durable, giving it an overall higher level of performance.
